Scale 1:10,000,000  
Reference Projections  
modified from the CIA World Factbook

April 2005

This is one of the standard reference maps used by the CIA World Factbook. It is based on the Robinson projection, which is a pseudocylindrical world map projection. It was developed by Arthur H. Robinson in 1961. The map is a good example of a world map that is both visually appealing and accurate.
